7. It will extend students' horizons intellectually and keep them up to date with shifting trends in the field of the International Criminal Court.

8. The current state of affairs is murky and unclear. India, however, does not belong to the International Criminal Court's State Parties. It is not yet obvious what course of action will be taken or what additional legislative measures will be implemented in the public interest. This element may also receive some insight from the current investigation.

9. In closing, it is respectfully suggested that there is a chance that the outcome of this study may provide some useful and workable recommendations.

It might be very helpful to individuals who are worried and could inspire their future studies in the area of the international criminal court.

9) Significance of the Study:

In addition to advancing justice, the International Criminal Court also seeks to advance peace. It has received a lot of criticism for doing neither, but it also faces some serious structural and political challenges: it has scarce resources, must work within institutional constraints, is subject to state manipulation, and is criticised for what is said to be a selective application of justice. However, since its convictions pose a danger to powerful people who commit severe crimes, the ICC might make a huge contribution to the promotion of global justice and peace as well as have a considerable influence on crime prevention.This research focuses on the ICC's activity on other continents in addition to Africa, the only continent where it has brought charges against alleged offenders. It argues that the ICC's ability to contribute to international justice and peace in a larger international context rest on its institutional stability, the backing it receives from countries, its unbiased work, and how potential criminals and victims see it throughout the globe. This study will provide a wealth of opportunities for developing nations to get justice based on various UN organisations', such as the ICC's, video evidence.
